Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 7, lines 1 and 2, the phraseology "one of a like plurality" is indefinite and fails to positively recite the claimed invention.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, and 9-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Hirschmann. As shown in figures 1 and 2, Hirschmann discloses a main frame (1) having a stop (the width of the main frame allows restricted movement at the point opposite from that of the spring), a back bracket (3) pivotally mounted (9) to the main frame (1) and having a rounded nose (the portion forward of pivot point (6)) which limits the movement, a seat (2) mounted to the main frame and having an arm (10) and restricted movement via slot (8), and a compression spring (5).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirschmann. All of the elements of the instant invention are discussed in detail above

Art Unit: 3634

except providing a pair of compression springs. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide Hirschmann with a pair of compression springs since a mere duplication of parts is an obvious design choice and one of ordinary skill in the art at the time of the invention would provide the chair of Hirschmann with multiple springs to increase the rigidity of the tilting components.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. patents to Miotto, Doerner, Hancock et al., Hsu, and Neumuller disclose elements similar to that of the applicants invention.
